

This page contains the technical specifications and regulations for the site plan, organized into several numbered sections:

1. BESCHREIBUNG

The first section provides a general description of the site and its location. It mentions the 'Landsberg am Lech' development and references to specific planning documents.

2. STRUKTUR- UND VERLEBENSDETAILS

This section details structural and living conditions. It includes a legend for various symbols used in the plan, such as different types of walls, foundations, and landscaping elements. It also specifies requirements for building materials, foundations, and the integration of green spaces.

3. VERLEBENSDETAILS

The third section focuses on the living environment. It includes detailed drawings of window and door thresholds, and specifies requirements for the placement and maintenance of trees and plants. It also addresses the integration of outdoor spaces and recreational areas.

4. VERLEBENSDETAILS

The fourth section continues the details on living conditions, focusing on the design of courtyards, terraces, and other outdoor areas. It includes drawings and specifications for the placement of furniture, lighting, and other amenities to enhance the quality of life in the development.

5. VERLEBENSDETAILS

The fifth section provides further details on the living environment, including specifications for the design of stairs, ramps, and other circulation elements. It also addresses the integration of public spaces and the overall character of the development.

6. VERLEBENSDETAILS

The sixth section covers the final details of the living environment, including specifications for the design of parking areas, storage spaces, and other utility areas. It also includes a final summary of the key requirements and a reference to the overall planning context.
